There is already some physics fun to be had but it has a lot of room to improve.

Graphics need some serious optimization, at points I was looking at a slideshow.

Music\Sound should be on by default.

Lots of maps and characters.

Maybe add some goals and funny quips similar to Goat Simulator.

<https://youtu.be/WS227ZSp87E>. Excellent ASCII-Styled Strategy RPG. the finale that finally brings me my two favourite romance options. lmao 5000 achievements boi. Fun Game. Once you get to know the game and how to set up your village up. The updates are often so thats good too. The game has came far from when I first played this. Also Should add more achievements to the game.

[Also would be cool if this game is added to IOS for the iPad. This came is great and is getting better by the time. Keep up the good work and hopefully this will be on the IOS market. This is a fun game to pass time. Survivors has became even more fun with the more updates from when I first played this game.. A very typical \(and cute\) match 3 game with a couple of extras that are supposed to make it stand out from the rest. It gets boring real fast, though. Played it for 3.5h the day I bought it, and probably not going back to it ever again.](#)

I like the story for this game, and have tried playing it a few times. Unfortunately there are several things that make the game difficult to play. Maybe this is due to GamePad or Mouse sensitivity, but I don't seem to have these types of issues with other games.. 8/10 "I'd say this puzzle game is one of my favs."

Usually I don't have the patience to go through every level of a puzzle game, but this one was different for me.

Your goal is to manipulate genes to get a desired shape. You can move em, dupe em, grow em... Actually you cannot always do all those things, every molecule have its own attribute and you must use em all and have the desired gene shape in the end to complete the level. All of this under a certain maximum of moves per level. Some levels have elusive patterns : shortcut to completing levels in a faster way, but remember the special attributes of ur genes must be used.

Maybe it's the good music? Maybe it's the elusive patterns you can get? I don't know why it's fun, best thing you can do is download the free demo and try it yourself, it is small to download and if you love the demo and think you will love it for a few hours, you will love the game.

Totally worth it's money and time.. Starts out as a slightly easier Ghosts 'n' Goblins clone, but then branches away from that and gets tougher and more interesting. Not bad.. Reviewed live on The One Review over at [twitch.tv/runew0lf](https://www.twitch.tv/runew0lf)

[Imagine a game that sounds like you are in charge of directing and orchestra of chimps.](#)

[Now take away any kind of fun.](#)

[And put in some mindless task, like talking to a small child.](#)

[Music i cant say wether its good or bad as its just a random jumble of sounds.](#)
[graphics i suppose look ok...](#)

[just gameplay is complete tosh!](#)

[.Great Software. If you are interested in the publishing feature \(publishing directly to youtube\) you will want to go directly to the acoustica site though and get the version that is 10 dollars more.. I liked the game. If you look around, you can find it cheaper. It's fun and challenging.. WHEN IS THE OFFLINE MODE!!!!](#)
